STATISTICS OF CLASS I MOTOR CARRIERS, 1946

INTRODUCTORY STATEMENT

The Interstate Commerce Commission under authority of Section 220 of the Interstate Commerce Act requires the large common and contract motor carriers subject to its general jurisdiction to file quarterly and annual reports.

This summary of annual statistics continues the publication which began for the year 1938 and is the ninth in the series. It is similar to that for 1945 with the exception of the tables covering employees and their compensation, which have been expanded to show days and hours worked. The carriers' reports have been examined in the Bureau of Motor Carriers and the corrected reports form the basis of the present tabulation.

Motor carriers are divided by the Interstate Commerce Commission for reporting and accounting purposes into classes according to the amount of their annual gross operating revenues as follows: Class I, revenue above \$100,000; Class II, revenue from \$25,000 to \$100,000; and Class III, revenue less than \$25,000. The revenues and other data reported by the carriers relate to their entire operations, including interstate operations, if any. In some cases, the revenue from the latter operations considerably exceeds those derived from transportation in interstate commerce.

No data are available with which to estimate the relative importance of Class I carriers in 1946. It was estimated that in 1943 the revenue of Class I carriers of property represented about 60 percent of the total revenues of intercity and local carriers of property of Classes I, II, and III, and similarly that Class I carriers accounted for about 80 percent of the revenues of motor carriers of passengers. Revenues of carriers of both property and passengers were omitted in deriving these percentages. Data for those carriers transporting both property and passengers are shown separately in tables 87 and 88 and they should be considered in obtaining complete data for either or both property and passenger carriers.

As may be seen from the table of contents, the Class I carriers have been aggregated, for the purpose of the present compilation, into three groups: Carriers of property, carriers of passengers, and carriers of both property and passengers. The first two groups have been subdivided to show returns separately for carriers engaged in intercity service and for those engaged in local service. The carriers of property engaged in intercity service have been aggregated into common carriers of general freight, common carriers of commodities other than general freight, and contract carriers, operating owned equipment exclusively or principally. Those carriers of property engaged in intercity service operating with owned and leased equipment which reported "Equipment Rents - Debit" amounting to 10 percent or more of their total "Operation and maintenance expense," are shown separately. Of the total of 421 such carriers, 385 were common carriers and 36 were contract carriers.

For the purpose of this publication, carriers of property which derive 25 percent or more of their total operating revenues from local service are classified as local carriers. Passenger carriers reporting both intercity and local and suburban traffic whose average fare is 20 cents or less are classified herein as local carriers. The revenue and number of passengers applicable to charter, sightseeing or special service are not used in computing the average fare per passenger. Carriers engaged exclusively in charter, sightseeing or special service are classified as local, regardless of the average revenue per passenger.

Local and suburban service, property and passenger, is service performed within a municipality and within the trading and suburban residential area adjacent thereto.

Intercity service includes all services operated beyond the limits defined for local and suburban service.

Attention is called, as in previous statements, to the Commission's order of September 21, 1942, effective October 1, 1942. This order provided that payments for "Purchased Transportation," previously charged in total to "Transportation Expenses," shall be charged to "Drivers' and Helpers' Wages and Bonuses," and "Equipment Rents - Debit," if the services are performed by owner operators or private carriers. If the services are performed by motor carriers holding Federal or State operating authority, the payments shall be charged to the freight revenue account. The Commission's order further required that payments to other carriers for performing the reporting carrier's collection and delivery services be charged against revenues and not included, as theretofore, in "Terminal Expenses." Also, a new account, "Local Revenue," was set up effective with the last quarter of 1942, for reporting revenues from local operations which previously had been included in "Freight Revenue -- Common Carrier," and "Freight Revenue -- Contract Carrier."

In addition to the summary tables, abstracts are given of selected items of information for 566 individual carriers of property and 147 carriers of passengers having operating revenues over \$500,000.

In order that all tables relating to a group of carriers would cover the same number of carriers, it has been necessary to omit 33 carriers of property with total operating revenues of \$6,369,488. Of the 33 carriers, 13 transported films or wearing apparel or were oilfield haulers or "driveaway" carriers. These carriers were not required to report the weight of the commodities they transported. The remaining carriers filed reports which were either incomplete or not usable in some respect. Of the 33 carriers, 29 were intercity carriers with revenues of \$5,501,135 and 4 were local carriers with revenue of \$868,353. There were also two carriers of passengers omitted with total operating revenues of \$264,251 because of incomplete data.

Table 46 shows that there were 1,307 common carriers and 184 contract carriers of property which reported ton-miles of freight carried. The revenue, expenses, number of vehicles, vehicle-miles, tons or passengers carried, and fuel consumed are given for these carriers to permit of useful comparisons.

Attention is called, particularly in the case of carriers of passengers, to the fact that data as to intercity traffic and operations are also found in the tables for carriers classified as engaged in local service and that, to a lesser extent, data as to local traffic and operations are also found in the tables for intercity carriers.

The Greyhound Corporation, a holding and management company which owns the controlling interest in the stock of 21 reporting carriers, also conducts motor carrier operations under the name of Eastern Greyhound Lines of New England (New England Region) and as Teche Lines, Inc. (Southern Region). The data here shown are based on accounting and statistical records maintained by these operating units.

1/ This table is restricted to carriers owning all or most of the equipment operated. It excludes carriers which reported "Equipment rents - Debit" amounting to 10 percent or more of total "Operation and maintenance expenses."

2/ Includes duplications on account of tonnage received from connecting Class I motor carriers.

3/ Basic figures include expenses of operating vehicles in intercity and in local service; these expenses are not separable. Comparisons of average revenue and expenses per intercity vehicle-mile are therefore subject to qualification, particularly where the local revenue is a large part of the total revenue.

 2/ Includes duplications on account of tonnage received from connecting Class 1 motor carriers.

3/ Basic figures include expenses of operating vehicles in intercity and in local services; these expenses are not separable. Comparisons of average revenue and expenses per intercity vehicle-mile are therefore subject to qualification, particularly where the local revenue is a large part of the total revenue.

TABLE 33.-AVERAGE NUMBER, TOTAL COMPENSATION, AND AVERAGE COMPENSATION OF EMPLOYEES BY CLASSIFICATION - CONTRACT CARRIERS ENGAGED IN INTERCITY SERVICE OPERATING CYCLED EQUIPMENT PRINCIPALLY, 1946 1/ BY DISTRICT AND REGION

Table with columns for Classification of employees, All districts, Eastern district, Total, New England region, Middle Atlantic region, Central region, Southern region. Rows include Number of carriers represented, Equipment maintenance and garage, Transportation, General Operators, Terminal, Sales, tariff, and advertising, Insurance and safety, Administrative and general, and Total - Daily basis/Total - Hourly basis.

Table with columns for Classification of employees, Western district, Total, Northeastern region, Mid-Western region, Southeastern region, Rocky Mountain region, Pacific region. Rows include Number of carriers represented, Equipment maintenance and garage, Transportation, General Operators, Terminal, Sales, tariff, and advertising, Insurance and safety, Administrative and general, and Total - Daily basis/Total - Hourly basis.

1/ This table is restricted to carriers using all or part of the equipment operated. It excludes carriers which reported "Equipment rents - Profit" amounting to 10 percent or more of total "Operation and maintenance expenses."

NOTE. - The symbol "D" designates those employees reported on a daily basis. All other classes are reported on an hourly basis.

1/ This table is restricted to carriers owning all or most of the equipment operated. It excludes carriers which reported "Equipment route - Debit" amounting to 10 percent or more of total "Operation and maintenance expenses."

2/ Basic figures include expense of operating vehicles in intercity and in local service; these expenses are not separable. Comparisons of average revenue and expenses per intercity vehicle-mile are therefore subject to qualification, particularly where the local revenue is a large part of the total revenue.

TABLE 44.—AVERAGE NUMBER, TOTAL COMPENSATION, AND AVERAGE COMPENSATION OF EMPLOYEES BY CLASSES - CARRIERS ENGAGED IN INTERCITY SERVICE OPERATING WITH OWNED AND LEASED EQUIPMENT, 1946 1/2 BY DISTRICT AND REGION

Main data table with columns for Classification of employees, All districts, Eastern district (Total, New England region, Middle Atlantic region, Southern region), and Central region. Rows include categories like Equipment maintenance and garage, Transportation, Owner-Operators, Terminal, Sales, and Insurance, ending with Total - Daily basis and Total - Hourly basis.

1/2 This table is restricted to carriers operating with owned and leased equipment. It includes carriers which reported 'Equipment rents - Debt' amounting to 10 percent or more of total 'Operation and maintenance expense.' A list of the carriers reported no owned equipment. NOTE. -- The symbol 'D' designates those employees reported on a daily basis; all other classes are reported on an hourly basis.

1/ This table is restricted to carriers with owned and leased equipment. It includes carriers which reported "Equipment rents - Debit" amounting to 10 percent or more of total "Operation and maintenance expenses." A few of the carriers reported no owned equipment.  
2/ Includes duplications on account of tonnage received from connecting Class 1 motor carriers.

3/ Basic figures include expense of operating vehicles in intercity and in local services; these expenses are not separable. Comparisons of average revenue and expenses per intercity vehicle-mile are therefore subject to qualification, particularly where the local revenue is a large part of the total revenue.

TABLE 46.--OPERATING STATISTICS - CARRIERS REPORTING REVENUE TON-MILES IN INTERCITY SERVICE (These carriers are included in preceding tables) BY DISTRICT AND REGION, 1946

Table with columns for Item, All districts, Eastern district (Eastern district Total, New England region, Middle Atlantic region, Central region), and Southern region (Common, Contract). Rows include Number of carriers represented, Average number of trucks and tractors, Vehicle-miles operated, Tons of revenue freight, Freight revenue, Total expenses, and AVERAGES.

1/ Includes duplications on account of tonnage received from connecting class 1 motor carriers. 2/ In many instances the ton-miles reported were designated as "estimated." 3/ Basic figures include expenses of operating vehicles in intercity and in local services which are not separable. Comparisons of average revenue and expenses per intercity vehicle-mile are therefore subject to qualification, particularly where the local revenue is a large part of the total revenue.

4/ Average load is based on both trips with load and trips without load and is derived by dividing revenue ton-miles by intercity vehicle-miles. 5/ Average haul is derived by dividing revenue ton-miles by tons of intercity revenue freight carried.

1/ "A" Regular route - Scheduled service; "B" Regular route - Non-scheduled service; "C" Irregular route - Radial service; "D" Irregular route - Non radial service.

2/ Basic figures include expenses of operating vehicles in intercity service and in local service which are not separable. Comparisons of average revenue and expenses per intercity vehicle are therefore subject to qualification, particularly where the local revenue is a large part of the total revenue.  
 3/ Includes Driveaway-miles as follows: All districts, 22,328,118; Eastern district, 81,253,220; Middle Atlantic region, 8,500,131; Central region, 12,753,009; Western district and Southwestern region, 1,074,598.

1/ "A" Regular route - Scheduled service; "B" Regular route - Nonscheduled service; "C" Irregular route - Radial service; "D" Irregular route - Nonradial service.

2/ Basic figures include expenses of operating vehicles in intercity and in local service which are not separable. Comparisons of average revenue and expenses per intercity vehicle-mile are therefore subject to qualification, particularly where the total revenue is a large part of the total revenue.

3/ Includes driveaway-miles as follows: All districts, 16,178,689; Eastern district and Central region, 14,740,743; Western district and Mid-Western region, 1,437,946.

1/ The amounts shown for retirements of equipment differ to a minor extent from those shown on table 70. These differences are mainly the result of the fact that the latter table is confined to complete units of equipment, whereas this table also includes retirements of other than complete units and adjustments.
